Lifestudio Pop – mini smart projector

EF-62B

KEY FEATURES:

- **Triple Core Engine –** new Epson technology that combines 3LCD and RGB LED to deliver vivid colour reproduction and wide colour gamut for a more immersive viewing experience
- **Bright and vibrant image quality –** up to 700 lumens colour brightness and 700 lumens white brightness
- **Exceptionally sharp 4K[1] experience –** 4K PRO-UHD uses advanced pixel shifting technology and image processing to deliver amazing detail and clarity without sacrificing picture brightness
- **RGB LED light source –** provides up to 20,000 hours of virtually maintenance free operation
- **Effortless portability –** compact, lightweight and easy to move from room to room
- **Intelligent instant setup –** auto focus, auto keystone, auto obstacle avoidance, auto wall colour correction and screen fit
- **Built-in Google TV[2] –** with Netflix, Youtube, Prime Video, Disney+ and many more
- **Rich, room-filling audio –** two built-in speakers featuring Sound by Bose[3] and Dolby Audio technology for a truly immersive experience
- **Up to 150-inch image size –** transform virtually any wall into a giant screen
- **3 year projector warranty –** enjoy peace of mind

features & benefits

3LCD technology

All Epson projectors are based on 3-chip LCD technology for amazing colour, incredible detail and solid reliability. 3LCD's 3-chip architecture dedicates an entire chip to process each primary colour – red, green and blue, continuously. Unlike single-chip technology that delivers colour sequentially, you get full-time colour. The result is vibrant, realistic images and video all delivered with 3LCD's true-to-life colour.

Triple Core Engine

Enjoy outstanding image quality with Epson's Triple Core Engine technology, which combines Epson's 3LCD projection system and advanced light-source design to deliver bright, vivid and accurate colours. Paired with a long-lasting LED light source rated for up to 20,000 hours, it provides reliable, maintenance-free performance for years of entertainment.

Up to 3x brighter colours with Epson projectors[4]

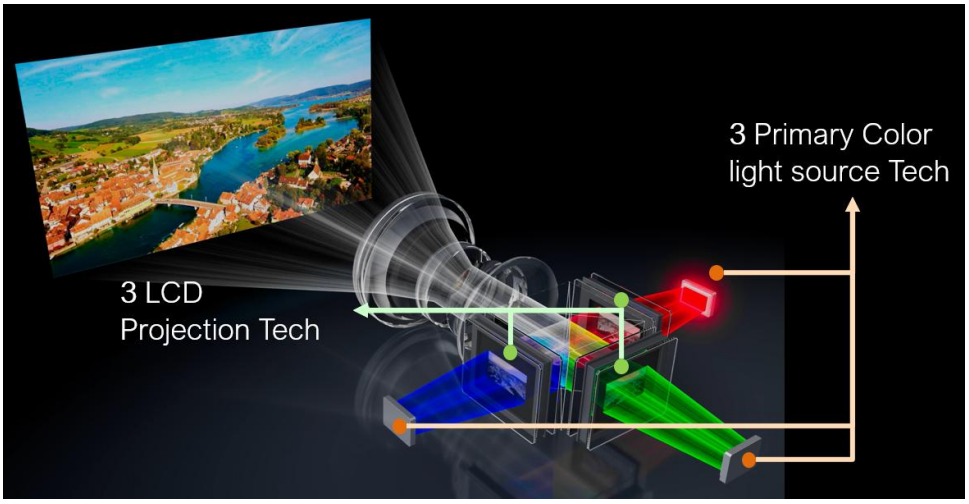
Epson projectors use 3LCD engines that have no colour wheel with a white segment and therefore don't force a trade-off between white and colour brightness. In fact, Epson projectors have up to 3x brighter colours than their leading competitive 1-chip DLP projectors[4].

features & benefits

Vibrant images on massive display

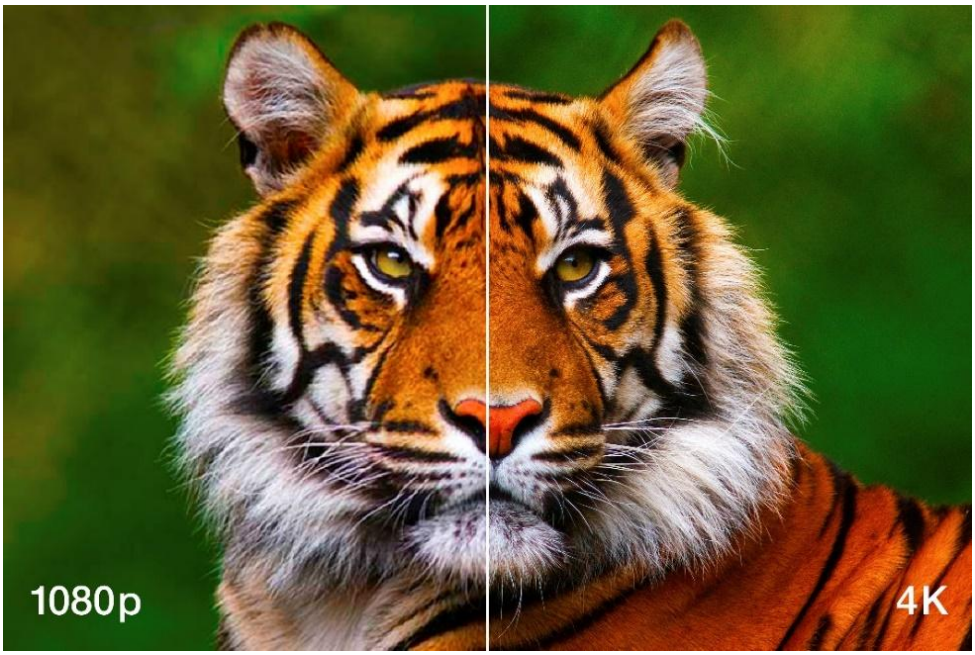
Powered by Epson's latest Triple Core Engine technology, the Epson Lifestudio Pop delivers up to 700 lumens of both white and colour light output, producing bright, vibrant images for everyday entertainment and more.

The Epson Lifestudio Pop brings an impressive up to 150-inch display experience, transforming any space into a big-screen entertainment environment.



Experience stunning 4K PRO-UHD[1]

Enjoy breathtaking detail and vibrant colours with Epson's 4K[1] PRO-UHD technology. Combining advanced pixel-shifting with HDR support, the Lifestudio Pop delivers sharp, lifelike images with exceptional clarity, making every movie, game and sporting event more immersive on the big screen.



True, deeper, richer blacks

With an exceptional 5,000,000:1 dynamic contrast ratio, the Lifestudio Pop delivers stunning depth and clarity across every scene. Dark areas appear richer and more detailed, while bright highlights maintain impressive brilliance creating a cinematic experience filled with lifelike contrast and realism.

features & benefits

10-bit colour processing

Full 10-bit HDR colour processing utilises 100% of the HDR source information. Combined with Epson's advanced image processing and vibrant colour performance, HDR content is reproduced with outstanding depth, realism and natural colour expression.

Frame interpolation

Frame Interpolation technology inserts additional frames between original video frames to create smoother, more natural motion. This helps reduce motion blur during fast-moving scenes, making sports, action movies and gaming appear sharper and more fluid for a more immersive viewing experience.

Immersive gaming

Gamers can now take full advantage of the latest generation of gaming on a 150" 4K[1] display with HDR. The near-seamless integration into your gaming setup creates a captivating experience, where the game world expands beyond the confines of a traditional screen.

With input lag times below 20 ms[5], it ensures a responsive gaming experience, while the vibrant colours and sharp details bring games to life in a way that's both exhilarating and visually stunning.

Epson Lifestudio Pop has a Game Mode specifically designed to enhance gaming experience.

features & benefits

Lightweight, portable & ready to play

Take big-screen entertainment anywhere with the Epson Lifestudio Pop. Its compact, lightweight design makes it easy to move from room to room or take on the go, providing flexible entertainment wherever you need it. Whether it's movie night in the living room, gaming in the bedroom, or outdoor viewing with a compatible power source, the Epson Lifestudio Pop delivers impressive performance and immersive experience.

Intelligent instant setup

The Epson Lifestudio Pop makes setup effortless with its intelligent auto correction technology. It automatically adjusts keystone, focus, obstacle avoidance and wall colour correction to deliver a perfectly aligned, sharp and colour-accurate image with minimal user intervention. For added convenience, the screen fit feature allows users to easily adjust the image to match the screen size and projection area, helping achieve an optimal viewing experience without complicated setup.

Auto keystone correction

Screen fit

Auto obstacle avoidance

Auto wall colour adjustment

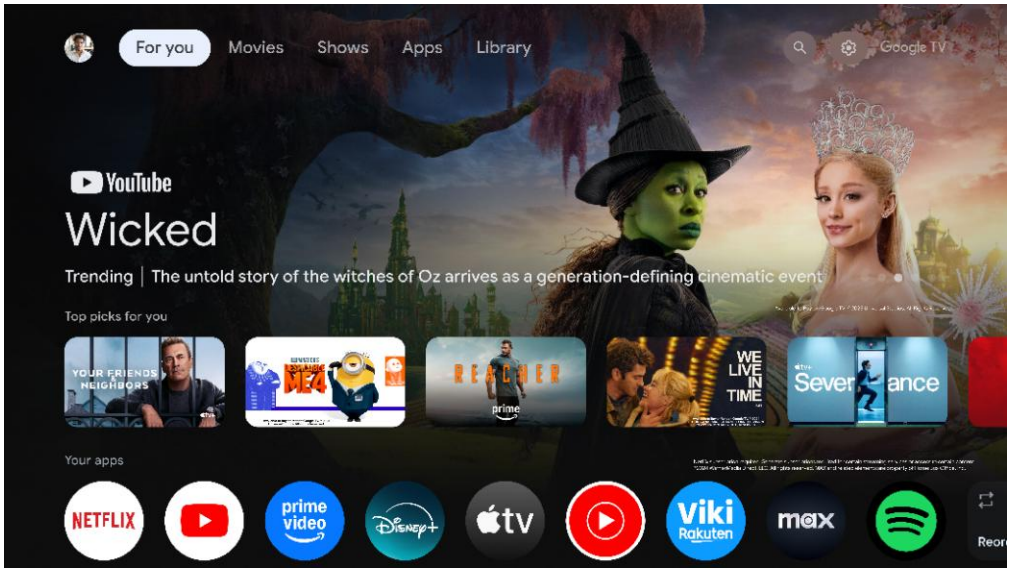
The Epson Lifestudio Pop combines portability with intelligent instant setup, automatically adjusting focus and image alignment for a sharp, perfectly sized picture in seconds. Enjoy hassle-free big-screen entertainment wherever you go.

features & benefits

Entertainment you love, with a little help from Google[2]

It's all right here. With 400,000+ movies and shows available across 10,000+ apps, Google TV™ takes streaming to the next level – bringing together your favourite entertainment from across your apps and organising it all, just for you.

The Lifestudio Pop comes with built-in Google Assistant, allowing you to control your projector effortlessly using just your voice.



Premium Sound by Bose[3]

The Lifestudio Pop delivers powerful and room-filling sound enhanced by Bose[3].

The custom designed stereo system creates audio you can feel, delivering rich, balanced sound with deep bass, pulling you and everyone around you, right into the action. We can't wait for you to hear it.

Connectivity

1. 4K Resolution Enhancement Technology shifts each pixel to produce an image on screen, up to the stated specification.
2. Google TV is the name of this device's software experience and a trademark of Google LLC, Google, YouTube and YouTube Music are trademarks of Google LLC.
3. Sound by Bose is a trademark of Bose Corporation used under license by Epson.
4. Colour brightness (colour light output) in brightest mode, measured by a third-party lab in accordance with IDMS 15.4. Colour brightness will vary depending on usage conditions.
5. There is no official standard for input lag measurement and this measurement is made based on the method set by Epson. Please note, each manufacturer measures input lag independently according to their own methods and therefore it is recommended to use as reference. Projector input lag varies in consequence of a difference of input signal and setting conditions.
